

Employments:

- | | | |
|---|---------------------------|--------------------------------|
| Senior Software Engineer | Target Corporation | June 2018 – Till Date |
| <ul style="list-style-type: none">Built a product called “Risk/Assurance Engine” from scratch for Digital Target.com which identifies threat indicators and provides scores and facts around them. This product helps the target to identify a bad guest or threat user and add an extra layer of security without adding any friction to our customers. Currently, this product is taking 100% guest traffic.Built a product (UI as well as backend) for “Cyber Threat Intelligence” (CTI-Team) to create a threat pattern rule, and we are using this rule in our main product (Risk Engine) to make our assurance score stronger. Worked at end-to-end development and currently, this is in the Production instance. | | |
| Software Engineer | Subex | June 2016 - May 2018 |
| <ul style="list-style-type: none">Worked on a Product called “ROC-Revenue Assurance”, this product is built for Telecom. Worked as an individual contributor in a core team and build so many important features in this product.Build a new functionality where Telecom company set or update their tariff rate according to city, zone. | | |
| Associate Engineer | SLK Software | August 2014 - June 2016 |
| <ul style="list-style-type: none">Developed a module called “re-sizing” pipes. This enterprise product is for “Emerson” where a user enters their full requirements in terms of Pipes and the product is going to suggest to you which pipes are the most suitable pipe for you.Fixing defects raise by the customer also provide my support over the peak time. | | |
